ABS SOFTWARE™

ABS™ Foundry Brochure

- Proven software for over 25 years in the foundry industry..
- Feel confident about maximizing low cost scrap that is available while exceeding customer expectations.
- Integrated software from procurement to product.

ABS Software™ is customized for the foundry industry. Regardless if you have a Cupola, Induction or Electric Arc Furnace, ABS will calculate the **lowest cost** of possible charge combinations of raw materials, and still meet increasingly difficult alloy specifications. The net result is keeping your **inventory at the lowest and most economical level**. From the savings you will achieve from ABS, you can invest your cash into other productive ventures, or simply keep it.

ABS is installed by **industry experts** and maintained by **professional software engineers**. We will **train** your employees at your site. ABS customizes solutions to your needs. Each shop is different, and we will set up custom options that allow you to maximize your savings. ABS remains the best choice for over 25 years.
