

SLAG: THE ORIGINAL GREEN PRODUCT

For more than 20 years, TMS International's Johnstown, PA, operation, also known as the Parkhill site, has been a leading processor of high quality aggregate products. Perhaps that's why manufacturers, small businesses and government specify slag from TMS International for varying aggregate demands.

As one of the premier global outsourced industrial services companies to steel mills and foundries, we have compiled an outstanding record of service, cost effectiveness and environmental responsibility.

Our size is a great advantage to our customers in terms of the depth and breadth of service we offer, but we believe it is the strong personal commitment that TMS International brings to each customer that makes us especially effective.

TMS International's Johnstown operation offers you a technologically advanced source for steel aggregate products. You'll have peace of mind knowing that a leader in the industry is working for you. We stand ready to serve you top-quality aggregate products.

ENVIRONMENTALLY SOUND APPLICATIONS FOR AGGREGATE PRODUCTS

Blast furnace and steel furnace slag is among the world's most versatile materials. Iron and steel slag is an all-purpose construction aggregate that is produced during blast furnace, open hearth furnace, basic oxygen furnace and electric arc furnace steel making processes. This product has been used in everything from farm fields and roads to the manufacture of high performance concretes used in the construction of bridges.

TMS International is the North American leader in slag processing and metal recovery. Our pioneering technologies convert this beneficial product into cost-effective, versatile construction aggregate for green applications. TMS International transforms slag into versatile and valuable construction material for environmentally friendly, green beneficial use. Slag is an environmentally sound material that can compete with and in some cases outperform natural aggregates in quality.

OUR JOHNSTOWN, PA SITE PRODUCES:

- PennDOT Approved 2A (0" x 2") sub-base material
- 2B (3/8" x 1") base material
